

Fire Safety

Home Fire Safety

1. Each floor in your home should have a **Smoke Detector** and a **Fire Extinguisher**
2. Every member of your family should know how to get out of every room in your home at any time of day
3. Your family should talk about your Family Emergency Plan at least every 6 months:
 - Discuss how each member will get out of the home (day and night from every room)
 - Designate a meeting spot (like by the mailbox) where everyone can meet after getting out of your home
4. Replace batteries in your smoke alarms every 6 months
